RESUME

Mechanical Engineering student at Instituto Superior Técnico, with a growing passion for web development and a keen interest in venturing into the world of decentralized applications (DApps). My background in engineering has instilled in me a strong analytical mindset and a knack for problem-solving. Now, I'm excited to leverage my programming skills, particularly in web development, to explore the exciting realm of DApps and contribute to the future of decentralized technologies.

My programming journey has led me to master web code such as HTML, CSS, JavaScript, and some frontend and backend frameworks. Crafting responsive and visually appealing websites has become a true passion. However, my sights are set on a new horizon: decentralized applications (DApps). I'm eager to explore this exciting frontier, leveraging my programming skills and engineering mindset to contribute to the decentralized ecosystem, where innovation knows no bounds.

PERSONAL DETAILS

NAME: Rafael Filipe Galo

INTERESTS

My interests extend far beyond the confines of my professional life, adding depth and balance to my character. One of my greatest passions is playing guitar, a pursuit that has allowed me to channel my creativity and express myself in unique ways. One of my most transformative experiences occurred when **John Frusciante** made his triumphant return, which coincided with my own journey into playing guitar. I draw inspiration in all from legendary artists such as John Frusciante, Mark Knopfler, David Gilmour and Chet Atkins, who profoundly influence all my work. In particular, John Frusciante's album "Niandra Lades and Usually Just a T-shirt" has left an indelible mark on my life perspectives. The raw emotion and unfiltered expression in this album resonated with me on a profound level. It's not just an album to me; it's a masterpiece that continues to inspire my own love for life.

Beyond the realm of art, I have a profound appreciation for the natural world. Surfing and immersing myself in the beauty of nature are activities that rejuvenate my spirit and instill in me a sense of tranquility and wonder. I firmly believe that physical and mental challenges are essential for personal growth, and I actively seek opportunities to test my limits and expand my horizons.

I am deeply passionate about creating innovative web projects. The process of conceptualizing, designing, and bringing a project to life online fuels my creativity and problem-solving skills. I find tremendous satisfaction in harnessing technology to build user-friendly, engaging, and visually captivating digital experiences. Furthermore, I have a strong interest in the world of decentralized applications (DApps) and blockchain technology. The idea of programming decentralized apps that empower users and promote transparency and security in various industries excites me greatly. I see this technology as a catalyst for positive change, and I'm committed to staying at the forefront of this rapidly evolving field.

These diverse interests, ranging from music and web projects to programming decentralized apps, reflect my curiosity, adaptability, and eagerness to embrace new challenges and opportunities in both my personal and professional life.

EDUCATION

2018 - 2021	Escola Secundária Emídio Navarro 10.ºGrade - 12.ºGrade Curso de Ciências e Tecnologias
2021 - 2022	Instituto Superior Técnico Degree in Electrical and Computer Engineering
2022 - PRESENT	Instituto Superior Técnico Degree in Mechanical Engineering
